Intro

I've been coding for fun since 1998 and for a living since 2008. Senior full-stack engineer across SaaS, agency, and startup environments, owning products from conception and design to architecture, DevOps, and delivery, recently focused on AI-assisted workflows and automation.

Experience

Launchmetrics (Paris, France) *Jul 2017 – Present*

Senior Software Engineer *2021 – Present*

R&D Engineer *Jul 2017 – 2021*

- Full-stack development of SaaS web products and a companion mobile app across four teams, working in Scrum, Kanban, and hybrid Scrumban workflows from conception through delivery and maintenance.
- Led infrastructure projects, notably a migration from monolith to serverless, a migration from multirepo to monorepo, and the dockerization and migration of a product suite from PHP 5 to PHP 8.
- Created AI skills and an LLM wiki to help the team with its tasks and workflows.
- Onboarded and trained new hires, and assisted clients with IT issues.

Inock (Paris, France) *May 2012 – Dec 2016*

Software Development Analyst, Team Lead

- Built web applications for Apple and L'Oréal, along with bespoke websites, covering full-stack development, DevOps, and design from conception through delivery and maintenance.
- Led the team's transition from Waterfall to Agile/Scrum, introducing iterative planning and delivery.
- Onboarded and trained new team members and led junior developers.

Youmiam (Paris, France) *Oct 2012 – Jan 2013*

Lead Developer (side gig)

- Lead developer of the MVP, covering full-stack development and DevOps. It got the startup into an incubator and its first round of funding.

Mediascape (Athens, Greece) *Oct 2008 – Dec 2011*

Full-Stack Software Developer

- Owned websites and web apps end to end, covering full-stack development, DevOps, and design from conception through delivery and maintenance.
- Project management, training clients, and presenting demos to prospects.

Military Service (Greece) *Aug 2007 – Aug 2008*

Completed at the rank of sergeant; honorary rank for exceptional service

Projects

- Session Slayer: an app (and skill) to manage agent sessions across Claude Code, OpenCode, and Codex (github.com/aletzo/session-slayer).
- Zéros Défauts: built AI workflows to generate and publish short videos from the official video of the YouTube channel, and built the website (zerosdefauts.com).
- Boar Stories: a video game of interactive fairy tales for small kids (boar-stories.mydevnull.net).
- Gianale: AI-powered dashboards for ERPs (gianale.mydevnull.net).

Technical Skills

Languages: JavaScript, TypeScript, PHP, SQL

Frontend: React, Angular, Vue, React Native, Ionic, Tailwind CSS

Backend: Node.js, Express, Bun, Next.js, Symfony, Laravel

Data: PostgreSQL, MySQL, MongoDB, Elasticsearch

Cloud & DevOps: AWS, Azure, Cloudflare, Railway, OVHcloud, Docker, Nginx, GitHub Actions, Coolify

AI: Claude Code, Codex, OpenCode, Hermes, OpenClaw

Languages

Greek (native) • English (fluent) • French (fluent)

Education

University of Piraeus (Piraeus, Greece) *2001 – 2007*

BSc in Computer Science, specialization in networks and distributed systems (equivalent to a French Master 1)

Interests

Motorcycles • Cooking • Cycling • Nature • Burning tokens
